

BALANCEAIR

Device Features

- Air inlet with a thermostat for efficient airflow management and improved comfort in residential and commercial buildings
- Equipped with a wax thermostat that adjusts the valve opening based on the outdoor temperature (range: +10°C to -5°C)
- Requires no electricity
- Maintains sufficient ventilation via a minimal opening during colder weather
- Manual valve opening and closing
- G4 sleeve-type filter
- Telescopic ventilation duct (adjustable from 250 to 500 mm)

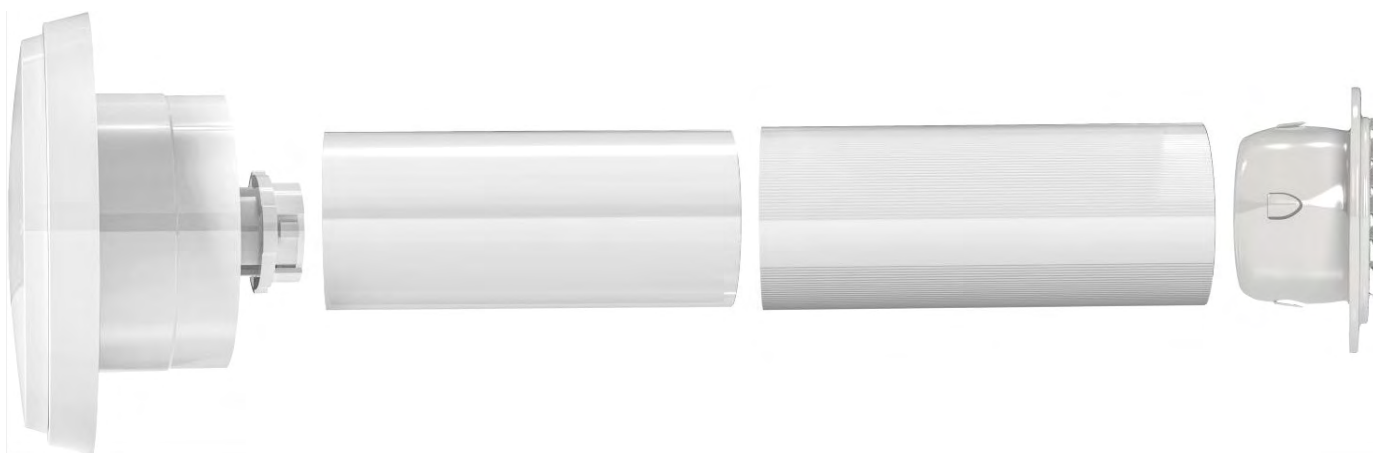

Technical Drawing

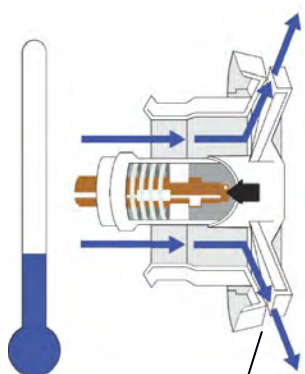

BalanceAir

Main functions

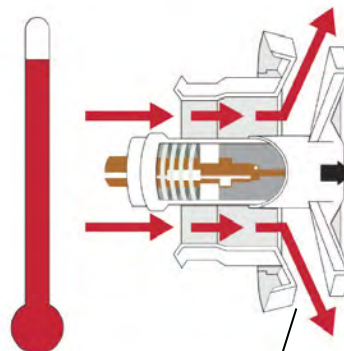

Thermostat

Valve closed

The valve will close completely at temperatures below -5°C.

Valve open

The valve will open fully at temperatures above +10.

TECHNICAL INFORMATION	SPECIFICATION
Maximum Capacity	30 m ³ /h
Filter	G4
Operating temperature	from -40°C to +50°C
Valve opening degree	from +10°C to -5°C
Duct diameter	100 mm
Regulacja kanału	250-500 mm
Net Weight (kg)	1 kg
Dimensions	36x5155x155 [mm]
